The **MINIPIG** in **BIOMEDICAL RESEARCH**

Peter A. McNulty • Anthony D. Dayan
Niels-Christian Ganderup • Kenneth L. Hastings

The Minipig in biomedical research

Table of Contents

Section One: Origin and Management of the Minipig

1. History and Development of Miniature, Micro- and Minipigs
Frederike Köhn (Germany)
2. Husbandry and Management
Roberta Scipioni Ball (USA)
3. Diseases of Minipigs
Nanna Grand (Denmark)
4. International Transportation of Minipigs
Finn Raaschou-Nielsen (Denmark)

Section Two: Welfare and Experimental Usage of the Minipig

5. Ethical Issues in the Use of Minipigs in Animal Research
David Morton (UK)
6. Animal Welfare Issues
M. Michael Swindle (USA), Alison C. Smith (USA) and Kathy E. Laber (USA)
7. Stress in Experiments
Larry Brown (USA) L. Peter Gade (Denmark)
8. Dosing Methods
Peter Clausing (Germany)
9. In-life Clinical Observations
David Cameron (UK)

Section Three: Pharmacology and ADME Studies in the Minipig

10. Minipigs in Absorption, Distribution, Metabolism and Excretion (ADME) Studies
Cornelia Preusse (Germany) and Mette T. Skaanild (Denmark)
11. Safety Pharmacology
Stephane Milano (France)

Section Four: Safety Assessment in the Minipig – Principal Body Systems

12. Dermal Toxicity Studies: Skin Architecture, Metabolism, Penetration and Toxicological and Pharmacological Methods
Andy Makin (Denmark), Jens Thing Mortensen (Denmark) and Bill Brock (USA)
13. Gastrointestinal Tract
Chris Van Ginneken (Belgium)
14. Heart and Cardiotoxicity
James R. Turk (USA)
15. Central and Peripheral Nervous Systems
Alan D Rasmussen (Denmark) and Karen M. Wegener (Denmark)
16. The Kidney
Peter A. McAnulty (Denmark)
17. Reproductive System including Studies in Juvenile Minipigs
Paul Barrow (France), Edward Marsden (France) and Peter A. McAnulty (Denmark)
18. The Endocrine System
Claudia Stark (Germany) and Jakob Walter (Germany)
19. Skeletal System
Hideki Tsutsumi (Japan)
20. Ocular Examination and Background Observations
Helmut Ehall (UK)
21. Spontaneous/Background Pathology of the Göttingen Minipig
Mikala Skydsgaard (Denmark) and Zuhail Dincer (UK)

Section Five: Genetics and Immunology

22. A Comparative Assessment of the Pig, Mouse, and Human Genomes: Structural and Functional Analysis of Genes Involved in Immunity and Inflammation
Harry Dawson (USA)
23. The Immune System of Pigs: Structure and Function
Patrick Haley (USA)
24. Allotransplantation in Miniature Swine
John S. Hanekamp (USA), Raimon Duran-Struuck (USA) and David H. Sachs (USA)
25. Xenotransplantation
Henk-Jan Schuurman (USA), Melanie L. Graham (USA), Thomas Spizzo (USA) and Clive Patience (UK)
26. Porcine endogenous retroviruses (PERVs) in xenotransplantation - A review of the importance of PERVs in porcine studies, with particular emphasis on the minipig
Linda Scobie (UK) and Olga Garkavenko (New Zealand)
27. Immunotoxicity Studies in Minipigs
André Penninks (The Netherlands) and Geertje J.D. van Mierlo (The Netherlands)

Section Six: Disease Models

28. Creation and conservation of genetically modified pigs: applications to genetic disease model and xenotransplantation
Hiroshi Nagashima (Japan), Hitomi Matsunari (Japan) and Kazuhiro Umeyama (Japan)
29. Stem Cell Research and Minipigs
Vanessa J Hall (Denmark), Stoyan G Petkov (Denmark) and Poul Hyttel (Denmark)
30. Minipig Models of Diabetes Mellitus
Dwight A. Bellinger (USA), Elisabeth P. Merricks (USA) and Timothy C. Nichols (USA)
31. Diet-induced Atherosclerosis
James R. Turk (USA) and Maurice H. Laughlin (USA)
32. Haemorrhage and Resuscitation Models Using Miniature Swine
John Burns (USA) and Charles Wade (USA)
33. Oral Biology and Dental Models
Sue Herring (USA), Yiming Li (USA), Yi Liu (USA), Professor Zi Jun Liu (USA), Tracy Popowics (USA), Katherine Rafferty (USA) and Songlin Wang (China)
34. Osteoporosis Model in Minipigs
Hideki Tsutsumi (Japan), Satoshi Ikeda (Japan) Toshitaka Nakamura (Japan)
35. Wound Healing Models
Peter Glerup (Denmark)
36. The Minipig in Chemical, Biological and Radiological Warfare Research
Stanley S. Hulet (USA), Maria Moroni (USA), Mark H Whitnall (USA) and Robert J Mioduszewski (USA)
37. The Minipig and Pig in Medical Device Research
Shayne C. Gad (USA)

Section Seven: Regulatory Perspective and Use of the Minipig in Developing Marketed Products

38. Regulatory Aspects – Pharmaceuticals, Medical Devices and Food Additives
Abigail Jacobs (USA) and Jan-Willem van der Laan (The Netherlands)
39. Adverse Responses to Drugs in Man: a critical comparison of reported toxicological findings in minipigs and humans
Niels-Christian Ganderup (Denmark)
40. Use of Minipigs in Testing Agrochemicals, Food Additives, and Industrial Chemicals
Warren Harvey (UK)

Section Eight: New Horizons and perspectives

41. Future Prospects: Possibilities and Perspectives
Anthony D. Dayan (UK)
